

READY-MADE LEARNING

Safeguarding Children Suite

Get your organisation prepared today

In social care, safeguarding children is a **legal** and **professional duty** under the **Children Act 1989/2004**. Professionals must identify risks, respond to concerns, and implement protection measures, following **Working Together to Safeguard Children 2018** and local safeguarding arrangements, ensuring every child grows up safe, supported, and free from harm.

If you're ready to create a culture where every child is truly **protected** and **supported**, this suite is for **you**.

Suite Options
